ergorapido cordless cleaners

ergorapido™

Ergorapido – you won’t believe it’s cordless.

You’ve probably tried one, or even owned one – a battery vacuum cleaner. They’re noisy, but low powered. They feel cheap and look plasticky. We know, because you told us. You also said that emptying dust is messy and that the batteries lose power after a few months.

A new breed of cordless cleaners

And we listened. The result is Ergorapido, a new breed of cordless cleaners that takes battery cleaning to a new level. They are powerful, yet quiet. The batteries last longer, and we’ve made emptying the dust really easy.

Solid and well-balanced

Ergorapido cleaners are also a pleasure to use. They feel solid, well-balanced and sit nicely in the hand. And you can steer the double-jointed floor nozzle around chair and table legs with a light twist of the handle.

Progressive design

We’ve also put a lot of work into the design. Research told us that if the machines look good, you won’t hide them away. And if they’re always out, they are ready whenever you need them.

Three different models

Ergorapido comes in three different models: the Cyclonic Handheld – a vacuum cleaner for table tops; the Cyclonic 2 in 1 – a stick vacuum cleaner with a detachable hand-held; and the Power Brush – a motorised floor sweeper.

Take an Ergorapido for a test drive. Feel the solid finish. Listen to it. Seeing is believing.

Cordless but not powerless.

Ergorapido™ Cyclonic Handheld

Most handhelds sound loud and angry, but struggle to get the job done. To increase suction and decrease noise levels, we redesigned the heart of the vacuum cleaner: the fan unit. The result? The Ergorapido Cyclonic Handheld, one of the most powerful handhelds on the market. And also one of the quietest.

Easy to empty the dust cup manually, or simply vacuum clean it.

In fact, we increased the suction power in two ways. In addition to redesigning the fan, we added cyclonic separation. This helps prevent the filter from getting clogged up even when the dust cup is full. By spinning dust and particles away from the filter, the cyclonic action keeps the suction at full power for longer.

Long-life batteries

The Handheld is powered by specially developed Ni-MH batteries which offer unusually consistent, long-life performance. Built into the handle, they give good ergonomic balance.

Easy to empty

Emptying dust from a handheld can be a messy business. So we've given you two ways to empty the Cyclonic Handheld: you can either snap open the nose of the machine to tip out the dust. Or you can use your main vacuum cleaner to suck out the dust through a patented trap door.

A few highlights:

Cyclonic vacuum power: The cyclone spins dust away from the filter to maintain high suction power.

Long-life battery: The non-fade Ni-MH battery will deliver top power throughout its lifetime.

Easy-to-empty dust cup: Just snap the front open and tip out the dust.

Vacuum clean the dust cup: Use your main vacuum cleaner to empty dust via a patented flap.

Ergorapido™ Cyclonic 2 in 1

We took the powerful Cyclonic Handheld, added longer-running batteries and then built an elegant floor stick around it. The Ergorapido Cyclonic 2 in 1 is a multi-purpose tool with a super flexible motorised brush nozzle. Use it to clean crumbs from the kitchen table, chair seats and the floor. And while you're at it, why not a quick whip around the living room?

The Handheld is the heart of the Cyclonic 2 in 1. Just press the buttons on the side of the stick to release it. Use the Handheld for work surfaces, furniture or in the car. Snap the Handheld back into place and you have a stick vacuum cleaner that can handle up to four rooms (80 m^2).

Cyclonic suction power

By combining cyclonic suction with a motorised brush, the 2 in 1 can pick up hairs and fibres, dust and crumbs from hard floors and carpets with ease. And thanks to the double-jointed floor nozzle, you can steer the 2 in 1 around furniture with a light twist of the handle.

Easy to empty

There are two ways to empty the Cyclonic 2 in 1: either flip open the nose of the machine and tip the dust out, or use the hose of your main vacuum cleaner to suck out the dust through a patented trap door.

Two power settings

The 2 in 1 has two power settings. Choose between full power, or if someone's sleeping or watching TV, select the quiet mode. You can store the 2 in 1 in the freestanding floor charger. Or if you're short on floor space, you can detach the base of the charger and mount it on a wall.

A few highlights:

Cyclonic vacuum power: The cyclone spins dust away from the filter to maintain high suction power.

Easy-to-empty dust cup: Just snap the front open and tip out the dust.

Vacuum clean the dust cup: Use your main vacuum cleaner to empty dust via patented flap.

Easy-to-steer nozzle: The double-jointed nozzle makes it easy to steer around furniture.

Easy-to-steer nozzle

Vacuum clean the dust cup

You'll be tempted to use it, even when the floor is clean.

Ergorapido™ Power Brush

Kitchen floors are often the messiest in the house. That's why we developed the Power Brush. It's quiet, super easy to steer and picks up dust, crumbs, sand and grit quickly and efficiently. Add to this enough battery time to clean up to four rooms (80 m^2), and you can use the Power Brush to sweep the living room, the hall, and a bedroom as well.

Easy-to-steer nozzle

Easy-to-empty dust cup

Non-spill dust cup

The Power Brush is also cleaner and less messy. Pick it up and a flap automatically seals the dust cup to prevent spills. And when it needs emptying, the dust cup is easy to remove.

High power batteries

With our specially developed Ni-MH batteries you don't have to worry about draining them periodically to maximise performance. Plus, they have the added advantage of not fading over time, providing top power throughout their life-span.

Easy to steer

The double-jointed nozzle head is steered by a light twist of the handle. When the phone rings – which you'll hear, thanks to the low noise level – you can leave the Power Brush standing upright, in parking mode.

Stylish good looks

The Power Brush can be recharged freestanding on the floor, or hanging flat on a wall bracket. And thanks to its stylish good looks, you can leave the Power Brush out, so it's always ready to use.

A few highlights:

Long-life battery: The non-fade Ni-MH battery will deliver top power throughout its lifetime.

Long running time: Enough battery power to clean up to four rooms (80 m^2) on a single charge.

Easy-to-steer nozzle: The double-jointed nozzle makes it easy to steer around furniture.

Easy-to-empty dust cup: The dust cup is easy to remove and there are no filters to clean.
